CONTENTS

Volume 13, 1961

Number 1 — February 1961

A. F. Kreuger and S. Fritz—Cellular cloud patterns revealed by Tiros I 1
J. S. Malkus, C. Ronne and M. Chaffee—Cloud patterns in hurricane Daisy, 1958 8
A. B. Arons, A. P. Ingersoll and T. Green III—Experimentally observed instability of a laminar Ekman flow in a rotating basin 31
E. Eliasen—On the interactions between the long baroclinic waves and the mean zonal flow 40
J. F. De Lisle and J. F. Harper—A calculation of the effect of largescale heat sources on southern hemisphere sub-tropical wind flow 56
F. A. Berson and A. J. Troup—On the angular momentum balance in the equatorial trough zone of the eastern hemisphere 66
J. N. Hunt—Oscillations in a viscous liquid with an application to tidal motion 79
H. Craig and D. Lal—The production rate of natural tritium 85
G. Lindblom—Advection over Sweden of radioactive dust from the first French nuclear test explosion 106
E. Dyring and B. Rosén—Standard errors at harmonic analysis on cosmic ray data 113
R. Green—Palaeomagnetism of some devonian rock formations in Australia 119

Shorter Contribution—

G. R. Edwards and L. F. Evans—Cloud droplet sampling technique 125

Number 2 — May 1961

A. Wiin-Nielsen—On the distribution of temperature relative to height in stationary planetary waves 127
P. Welander—Theory of very long waves in a zonal atmospheric flow 140
G. Arnason—A study of the dynamics of a stratisfied fluid in relation to atmospheric motions and physical weather prediction 156
T. N. Krishnamurti—On the vertical velocity field in a steady symmetric hurricane 171
H. Riehl and J. Malkus—Some aspects of hurricane Daisy, 1958 181
A. Ångström—Techniques of determining the turbidity of the atmosphere 214
H. Stommel—Thermohaline convection with two stable regimes of flow 224
E. B. Kraus and C. Rooth—Temperature and steady state vertical heat flux in the Ocean surface layers 231
P. G. Drazin—On the steady flow of a fluid of variable density past an obstacle 238
D. Kuroiwa—The study of ice sintering 252
W. G. Durbin and G. D. White—Measurements of the vertical distribution of atmospheric chloride particles 260
D. Stranz—Ozone measurements during solar eclipse 276
S. Lindgren and F. Lindholm — Atmospheric effects on the meson intensity recorded by the international standard cube at a high latitude station 280

Shorter contributions—

B. Saltzman—Note on the role of mountains in the energy budget of the atmosphere 291
B. Saltzman, R. M. Gottuso and A. Fleisher—The meridional eddy transport of kinetic energy at 500 mb 293
Letters to the Editor 296
Prof. Tor Bergeron, 70 years on August 15, 1961 303

Number 3 August 1961

B. R. Döös—A mountain wave theory including the effect of the vertical variation of wind and stability 305
A. Wiin-Nielsen—A preliminary study of the dynamics of transient, planetary waves in the atmosphere 320
P. D. Thomson—A dynamical method of analyzing meteorological data 334
F. B. Smith—The effect of advection in a region of no data 350
N. N. Richardson—Numerical tests of a method for dynamic analysis in regions of poor data coverage 353
E. O. Holopainen—On the effect of friction in baroclinic waves 363
H. Wexler—A boundary layer interpretation of the low-level jet 368
M. G. Wurtele—On the problem of truncation error 379
F. Webster—The effect of meanders on the kinetic energy balance of the Gulf Stream 392
P. Welander—Note on the propagation of baroclinic waves in a zonal ocean current 402
F. Brown, P. Goldsmith, H. F. Green, A. Holt and A. G. Parham—Measurements of the water vapour, tritium and carbon-14 content of the middle stratosphere over southern England 407
N. S. Shishkin—Forecasting thunderstorms and showers by the slice method 417
A. Ångström—Radiation to actinometric receivers in its dependence on aperture conditions 425
S. Haraldson—Rapid geomagnetic fluctuations 432

Shorter Contribution —

G. J. Haltiner—A note on the diurnal wind variation 438

Number 4 November 1961

H. L. Kuo—Convection in conditionally unstable atmosphere 441
W. L. Gates—The stability properties and energy transformations of the two-layer model of variable static stability 460
F. A. Berson—Circulation and energy balance in a tropical monsoon 472
R. A. Hanel and W. G. Stroud—The Tiros II radiation experiment 486
J. L. Reid—On the geostrophic flow at the surface of the Pacific Ocean with respect to the 1,000-decibar surface 489
M. E. Stern—The stability of thermoclinic jets 503
T. Okita—Size distribution of large droplets in precipitating clouds 509
C. E. Buell—Tropospheric geopotential and velocity variances 522
Index 524
